

About Us

As popularity amongst digital menus has increased, paper menus have become a trend of the past. Customers of today's new normal expect convenient and health conscious dining experiences. With social distancing becoming the new normal of social etiquette in post COVID-19 world, the traditional dine-in experience has inevitably changed.

Groak is a revolutionary technology designed to help your restaurant manage daily operations and adapt to your customers new expectations. Our technology provides the customer with the option to view and order menu items through their smartphone. It's a simple, but effective way of putting your customers in control.

Connect your customers directly to your new digital menu.

Features

Customizable Digital Menu Creation

Create a contactless digital menu that customers can explore.

Customize and update it anytime from your device, with immediate display of your updates to customers! Our team will create your digital menu experience in less than a week!

Smart Ordering Technology

Connect your customers directly to your digital menu so they can view, order, and check-out on their own device. Seamlessly integrate customer orders with your POS system.

Table Management System

View real time order updates from each table using the device of your choice. Orders are automatically added and available in our webportal.

Additional Features

Automated Receipt Generation

Automated receipt generation, sent directly to your customer's phone after checkout.

Interactive Live Chat

Promote Safety and Wellbeing for your Customers! Interact with your customers at each table with our live chat feature to minimize health and safety risks to your staff!

Flexible Operation Management

Enable your staff to provide status updates about service timings, and receipt deliveries over mobile phones their customers.
